

Moiz Zubair – Bytewise Fellowship – Cloud Computing track – 2nd Sept

Task 3: Getting started AWS Cloud Practitioner

Topic #1: AWS Cloud Intro

Amazon Web Services:

AWS is the largest cloud computing platform which released its first product S3 (cloud storage) in 2006. It has over 200 fully featured services for a wide range of technologies.

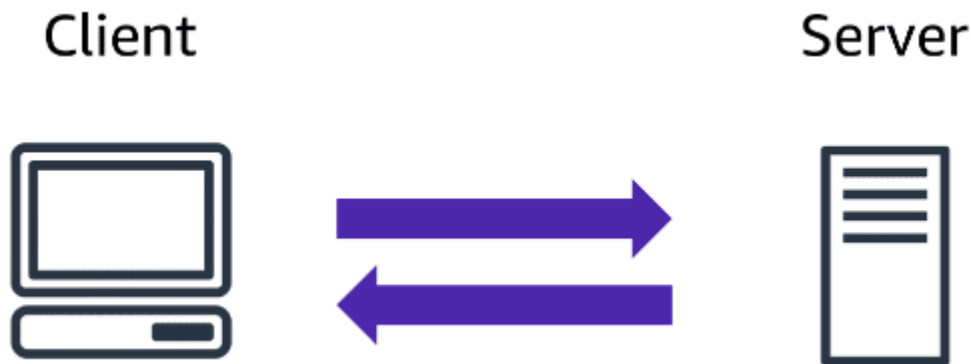

Topic#2: AWS Cloud Get Started

Created account on AWS and added all the necessary details

Topic#3: AWS Cloud Computing

Client Server Model:

Many clients using many services from a centralized server. The client makes a request to the server and the server responds to the request by offering the required data/service. Server completes the task required by client and returns information.

Deployment models:

Three models for deployment on-premises, cloud and hybrid. These models have been explained in the previous tasks.

Topic#4: AWS Cloud Benefits

Aws cloud benefits are like the other cloud computing benefits that have been explained earlier on such as Cost savings, Security, Scalability, Flexibility and speed etc.
